VENTURA GLOBAL AMONG EUROPE'S LONG-TERM GROWTH CHAMPIONS FOR THE THIRD CONSECUTIVE YEAR

Milan, October 2026 — Ventura Global has been included, for the third year in a row, in Europe's Long-Term Growth Champions 2027, the ranking compiled by Statista in collaboration with the Financial Times.

The ranking identifies the 300 European companies that achieved the strongest revenue growth over a ten-year period, in this edition 2015–2025. Unlike rankings based on a single year's performance, it measures growth sustained over the long term.

Over this period, **Ventura Global revenue nearly tripled**, rising from €4.19 million in 2015 to €12.17 million in 2025, representing a compound annual growth rate (CAGR) of **11.25%**.

Ventura Global is among 77 European companies, including just 16 from Italy, to have been included in all three editions of the Financial Times and Statista Europe's Long-Term Growth Champions ranking since its first edition.

"A third consecutive recognition suggests that our growth is not simply a matter of luck, but reflects a business model that continues to deliver results," said Gianni Fior, Managing Director of Ventura Global. "That model is built on the trust of our customers, the opportunities shared by our vendors, the support of our funding partners, and the dedication of our team. **This recognition belongs to all of them.**"

The company remains focused on providing flexible, customized solutions for the rental of scientific laboratory instruments, supporting laboratories across Europe.

About VENTURA Global

Empowering laboratories to innovate today and grow sustainably tomorrow

VENTURA Global provides tailored rental solutions for scientific and laboratory equipment, combining financial expertise with a deep understanding of scientific advancement. Operating across European markets, the company helps laboratories access advanced technologies through flexible, efficient financing solutions, supporting innovation and sustainable growth.
